Version 18.2

MBS.MAN.NEWS.UK.182

New Version

At regular intervals, Mamut launches new versions of Mamut Business Software. These main releases are available to all users with a Mamut Service Agreement.

We recommend that our customers update to the most recent main version.

Between the main updates, continuous improvements are made to the existing functionality. These versions are made available over the Internet through minor releases.

It is important to note that updates made through service releases do not necessarily affect all users, as the changes are often dependent on how you use the program and on which functions are available in your program.

The aim of this manual is to introduce you to the most important news in the latest version of Mamut Business Software and Mamut Online so that you may familiarise yourself with them. The documentation may refer to services and/or functions that are not included within your solution. If you wish to get more information regarding this, please contact Mamut. For information about more extensive versions, please contact us on 0207 153 0900 or by e-mail at: info@mamut.co.uk.

When you install a new version of the program, you will also receive an updated set of help files. You can access the help files with information about your current program window by pressing F1 when in the window. You can also use the online help which is now available on our website. The online help includes the latest information about the program.

On our website you can search for information in articles that are being updated and added to continuously. Based on our customers' feedback, we publish answers to frequent questions received by the Mamut Support Centre (FAQs). You can find the article search at www.mamut.co.uk/support.

The update and installation documentation can also be found on our website at www.mamut.co.uk/update

News in Mamut Business Software version 18.0, 18.1 and 18.2

Contact Management

Version 18.2

This version fixes some bugs, vulnerability and adds improvements to the Contact Management. For example, Greek and Finnish VAT and IBAN numbers will now be verified that they have been entered correctly.

eCommerce

Version 18.0

There are several improvements in the eCommerce module in Mamut Business Software version 18.

- In e-mail setting we have improved your user experience by reducing the amount of clicks needed to enter your e-mail addresses. You find this functionality in **View - E-Commerce - Website Settings - Settings Webshop - Customer Communication - Settings**.
- The functionality for sorting your product list in the web shop will now take effect.

Version 18.1

It is now possible to choose a delivery address to a different country than the invoice address in the webshop. In addition, you will be informed about cookies and how they are used to store what products you have added to your shopping cart.

System Improvements

Version 18.0

Mamut API

Mamut API is an add-on product to Mamut Business Software, that makes it possible to export and import information without using normal user interface. We have now added the possibility of opening activities automatically from outside of Mamut Business Software.

Microsoft® SQL Server® 2012 Express

From version 18 of Mamut Business Software the default Microsoft SQL Server will be version 2012 Express, which is compatible with operating systems Windows 7 and above. When installing Mamut Business Software on operating systems XP/Vista or Windows Server 2003, the default SQL Server will be 2008 R2 Express. Note the following when updating:

- If you have SQL Server 2008 R2 Express installed you will have the option of installing to version 2012 Express. If you do not want to update your SQL Server, simply deselect **Yes, update the SQL Server instance** option in the installation wizard.
- Mamut Business Software version 18 does not support Microsoft SQL Server 2005. Therefore it is required to upgrade your SQL Server to at least version 2008 R2 Express.
- If you have a manually installed SQL Server, or/and have an instance named something other than Mamut, you need to update your SQL server manually before updating Mamut Business Software to version 18.

Version 18.2

Mamut Enterprise Business Intelligence

Mamut Enterprise Business Intelligence gives you a complete overview and ensures that you are constantly updated with the information that puts you in the driving seat and in full control. Having the right information means that you are always one step ahead, and in a position to make the necessary changes. In this version of Mamut Business Software, we have added **County** as a field when exporting sales and purchase data to a Pivot table.

Import from Microsoft® Excel®

In Mamut Business Software it is possible to import contacts and products using Microsoft Excel. In order to do so, you must create an Excel file with the data you wish to import. In this version we have added improvements to importing products and contacts:

- For the Excel product import, the recommended sales price is now imported correctly.
- For the Excel contact import, the payment condition is now imported correctly.

Reports

Version 18.2

In Mamut Business Software you are able to edit reports to fit your company standards. In this version of Mamut Business Software you are now able to edit the report **Reconciliation of stock value**. You can edit the report by selecting the report in the **Report module** and by clicking **Edit**, or you can select **View - Settings - Reports** and **Report/label editor**.

Sales

Version 18.2

This version fixes some bugs, vulnerability and adds improvements to the Sales module. For example, you will experience improvements when completing the wizard for repeating quotations.

News in Mamut Online version 7.0, 7.1 and 7.2

Mamut Online provides you with web based access to the information and functionality of Mamut Business Software, along with the services included within Mamut One.

Version 7.0

New user settings design

In version 7.0 of Mamut Online we are introducing a new design for user settings.

- You will now find a new user settings icon  on the right side of the top toolbar next to company settings and user administration.
- The user settings are now structured differently with a left hand menu. This makes the user settings more user-friendly and easy to find.

Founded in 1994, Mamut (OSE "MAMUT") is a leading European provider of complete, integrated software solutions and internet services for SME's.
